

Introduction:

The *Middleboro Gazette Index, 1925 - 1929* is a guide to the information contained within the *Middleboro Gazette* during the period January 1921 through December 1929. The information is as it appears in the newspaper. No attempt has been made to verify that the information given in the newspaper is accurate or to reconcile alternate spellings of family names.

The focus of the index is on the communities of Middleboro and Lakeville, Massachusetts. News from outside these geographic areas is included only if there is a direct link to these towns, i.e., Phineas T. Barnum and the Little People.

Special notations are used within the index to designate letters (l), tables (t), photographs (p) and illustrations (i). Authors of letters are cited either within the headline or in parentheses immediately following (l).

The often informal nature of reporting presents special challenges to researchers. Additional information about specific businesses, town departments or other concerns can be found under general headlines, i.e., Railroads, Streets, etc. when specific information is not provided.

Names are a particular challenge in a compilation of this kind. Multiple spellings, misspellings and incomplete names are just a few of the hurdles that must be overcome in order to glean every bit of information contained within the pages of the *Gazette*. For example, although there are both Pierce and Peirce families in Middleboro, inversion of the "i" and "e" is a common mistake. Sometimes the letter "n" is flipped and becomes a "u." Because of the word-by-word alphabetization used in this index, names with prefixes, like De Moranville, do not fall in the same place in the index as when the name is spelled without a space, DeMoranville. There are countless examples of how easily names get lost in an index because of spelling errors, so it is advantageous for the researcher to take a broad view when conducting research on individuals and families.

Due to the fact that the issues of the *Gazette* have been handled repeatedly prior to microfilming, there are occasionally cases where letters are missing from names. This does not present a particularly difficult situation unless the letters missing happen to be those

at the beginning of a name. Rather than leave this partial information out of the index, I have chosen to file these entries at the very beginning of the index. So be sure and check there for any entries that may pertain to your search.

It is my hope that the *Middleboro Gazette Index, 1925 - 1929* will provide a lasting resource for people researching the history of Middleboro and Lakeville, Massachusetts.

Important Notes on Page Numbering:

- 1) Between page 10 of the 5/14/26 issue and the first page of the 5/21/26 issue are four pages which are duplicates from the 2/12/26 issue: PLEASE IGNORE.
- 2) At the beginning of 1929 the 1/4/29 issue appears to be missing. So the roll begins with 1/11/29. The masthead of the 1/25/29 issue indicates that this issue should run 10 pages. But from this point to the next masthead (2/1/29) there are 14 pages. These 14 pages are from the following issues, in the following order.
 - a. 01/25/29: pages 1 through 8
 - b. 01/24/30: pages 9 and 10
 - c. 01/25/29: pages 9 and 10
 - d. 01/04/29: pages 3 and 4 (this is a remnant of the issue that was allegedly missing)
